DEVELOPER EXPERIENCE

LocalToMe, Front-End Developer, September – December 2022

<https://github.com/phoenixlai833/LocalToMe>

An interactive and responsive web application that locates and provides low-income families and individuals with free and accessible food resources near their area that are within their budgets..

Tech Stack: Next JS, React, Styled-components, Storybook, Mapbox, Firebase.

- Collaborated in an agile environment with 5 others, where we would have weekly stand ups, sprint reviews and sprint plannings.
- Scripted, organized, and wrote documentation in storybook for over 20 reusable components that were used throughout the project.
- Closely worked with back-end developers to ensure front-end components connected to the database, by performing code reviews.

RainCheck, Front-End Developer, January 2023

<https://github.com/null-name-qds/hackathon>

An interactive map web application providing insights on Vancouver's housing market and provides estimates on how long it will take for them to afford the housing. Created during BCIT's QDS 2023 Hackathon.

Tech Stack: Next JS, React, Axios, Mapbox, Styled-components, TailwindCSS.

- Fetched data from an open sourced API and displayed the data into information for our web application.
- Presented RainCheck as a top 8 finalist among 20+ teams in front of a panel of industry experts and an audience of 100+ people.

Share Food, Lead Developer, February – May 2022

<https://github.com/Pho86/ShareFood>

An interactive web application that has the goal to save food by sharing it with others; whether it be receiving or giving away leftover foods.

Tech Stack: Next JS, React, Styled-components, Material UI.

- Conducted user testing and translated user findings into UI/UX solutions.
- Communicated closely with designers to develop/design a responsive web application to ensure optimal user experience across devices.

EDUCATION

Digital Design and Development Diploma,

British Columbia

Institute of Technology,

September 2021

– May 2023

TECHNICAL SKILLS

Frameworks and

Front-End

Next JS, React,

React Native, Expo,

Nuxt 3, Vue JS,

Node JS, Express JS,

Styled-components,

TailwindCSS, SASS,

Storybook

Languages

HTML, CSS, Javascript,

Typescript

Databases

Firebase, SQLite

Design

Adobe Creative Suite,

Figma, Godot

Tools

Git, Vercel,
